Call for Papers

Welcome to the Ninth International Conference on Internet Computing for Science and Engineering (ICICSE|15). The conference will be held on the campus of the University of Iowa Research Park BioVentures Center, Coralville, Iowa, USA, Aug. 13-14, 2016.

Internet-based computing is an important and urgent field with multi-disciplinary research. It focuses on algorithms development and implementations of cyber-computing for scientists and engineers. Its impact is already being felt in many science and engineering disciplines. Current research in internet computing requires multi-disciplinary knowledge, not only in sciences and engineering but also in cutting-edge information technologies for academic and research computing. Many science and engineering explorations rely on mature, efficient algorithms and implementations, practical and reliable numerical methods, distributed and large-scale computation systems. Therefore, we have been continuing organize a series of internet computing for engineering areas and science domains. We have successfully organized annually-based conference called International Conference on Internet Computing for Engineering and Sciences. Every conference were held on one of the campuses in China in the past, where people touch the base and today's internet computing, while enjoying the beauty of the ice festival. All the previous conferences were very successful events. The ultimate goal of this kind of annual conference is to promote campus-wide research in computer science and information science, especially for graduate students who love to pursue their academic career. The conference vision is to break traditional computer science towards to multidisciplinary domains through internet-based computing and computations for science and engineering. This year we organized the conference again. The conference is the Ninth International Conference on Internet Computing for Engineering and Science (ICICSE 2016). It will be held on the campus of the University of Iowa Research Park and BioVentures Center, Coralville, Iowa, USA, Aug. 13-14, 2016.

This conference offers academic researchers, developers, and practitioners an opportunity to discuss various aspects of computational science and engineering-related computational methods and problem solving techniques for science and engineering research.

This conference is organized and sponsored by Scientific, Technology, Engineering, Mathematics, Education Society (STEMES), and MediX Computing LLC., USA, and Collaborated by UI Research Park and BioVentures Center, USA and Shanghai Shanda University, China. It will be operated by the conference program committee. We hope to attract people from diverse science and engineering disciplines, nationally and internationally, to attend the workshop, present their research results, share their experiences and ideas, and plan future collaborations.

The conference proceeding will be published by Conference Publishing Services (CPS). The conference will be submitted for indexing, including EI index. **All the previous ICICSE conference proceedings have been indexed by IEEE Explorer and Engineering Village's Ei and others.**

We welcome people to submit original paper(s), or participate in conference program. Appreciations always go to people who can organize special sessions, review conference papers, and make this event successful.

Submission web site: <https://easychair.org/conferences/?conf=icicse20162> or directly submit to icicse2016@stemesociety.org.

If you have any question regarding this conference, please contact Conference email address at icicse2016@stemesociety.org
